BULLSMOOR

DENTAL & AESTHETICS CLINIC

About Us

Established in 1950, Bullsmoor Dental & Aesthetics Clinic (formerly Bullsmoor Dental Practice) has been a part of the Enfield and Waltham Cross community for over 70 years. Having been taken over by Mr Jagani in 1987, the clinic is family run by a dynamic father and son duo who love being able to offer their patients continuity of care.

Our clinic focuses on family, general and cosmetic dentistry, offering everything from annual consultations and maintenance hygiene sessions to a wide range of treatments including gum disease treatment, restorative and prosthetic dentistry, teeth whitening, composite bonding, Invisalign®, dental implants and many more, all under one roof. As well as caring for your teeth, Bullsmoor Dental & Aesthetics Clinic offers a wide range of facial aesthetic and skin rejuvenation treatments, focusing on natural and safe results, using market-leading products and techniques.

Our warm, welcoming and energetic team is made up of highly experienced practitioners and new generation clinicians who are all dedicated to carrying out the highest quality of dentistry and aesthetics. As a team, we are committed to helping our patients find the smile that brings them health, happiness and confidence.

We look forward to welcoming you soon.

Your Clinicians

Shabir R. Jagani Principal Dentist

BChD (Leeds) MFGDP (U.K.) | GDC No.: 55185

Mr Jagani graduated from the University of Leeds in 1981 and started his career as an associate Dentist at Bullsmoor Dental Practice. He took over the Practice in 1987 and obtained his MFGDP in 1998. Between the years 1996 and 2005, Mr Jagani was a vocational trainer for newly qualified Dentists. Since then, Mr Jagani has gone on to train in

Cosmetic Adult Orthodontics. He has a wealth of knowledge both clinically and in his gentle approach to treating nervous patients. Shabir is an avid cyclist, enjoys travelling to Europe for cross-country rides and has also recently taken up a new hobby - mountain climbing! He enjoys spending time with family and frequently travels to the Middle East to provide dental care to under privileged communities.

Hiba Odabashy Associate Dentist

BDS (London) MJDF (U.K.) | GDC No.: 86142

Dr Odabashy qualified from King's College London in 2005 and achieved postgraduate membership of the Joint Dental Faculties in 2010. She joined Bullsmoor Dental & Aesthetics Clinic in 2007 and is able to offer quality dentistry with a focus on building confidence by creating a calm and relaxed atmosphere for her patients. She is qualified to

provide adult cosmetic orthodontics such as Invisalign® and Six Month Smiles®. Outside of dentistry, Hiba enjoys reading, baking and caring for her two boys.

Your Clinicians

Abbas Ali Manji Associate Dentist

BDS (London) PGCert. Dental Implantology | GDC No.: 278171

Dr Manji, a 2018 graduate from King's College London, has garnered experience honing his general dental skills across various practices in the UK. His professional journey has fuelled a passion for cosmetic and surgical dentistry. Dr Manji's approach to patient care is characterised by a gentle and patient-centric demeanour, emphasising the core values of health and happiness through effective communication. Dr Manji holds a PG Certification in Dental Implantology and has successfully completed the first year of the two-year Aesthetics & Restorative and Endodontic (Root Canal) Post Graduate Diploma programmes. He is also a visiting lecturer at the esteemed British Academy of Implant and Restorative Dentistry (BAIRD). His commitment to excellence is further highlighted by his completion of the renowned Composite Course by Style Italiano, based in Italy. Notably, he has had the privilege of participating in the interview panel for a prestigious dental school, contributing to the selection process for prospective students. Beyond his professional pursuits, Dr Manji is known for his vibrant personality and progressive mindset. He finds joy in various hobbies including psychology, photography and basketball. Furthermore, he dedicates his time to charitable dental trips to make a positive impact on oral health globally.

Rheeya Naik Associate Dentist

BDS (London) GDC No.: 284230

Dr Naik qualified from King's College London in 2019 and joined the Bullsmoor Dental & Aesthetics Clinic team in 2021. She has recently completed her MJDF Part 1 and is hoping to complete the final part in the near future. Rheeya enjoys all aspects of dentistry and has a keen interest in composites, crowns and onlays, attending advanced courses in these fields. She has a calm and friendly approach and enjoys treating nervous patients by putting them at ease. Rheeya also enjoys treating children, ensuring they have a pleasant visit to the Dentist. Outside of work, Rheeya enjoys travelling, baking and spending time with family and friends.

Your Clinicians

Abbas Ali Jagani Dental Hygienist & Therapist | Facial Aesthetician

DipHE RDH RDT (Lond.) PGDip. Periodontics | GDC No.: 249670

Having been exposed to dentistry by his father throughout his childhood, Abbas started his dental career as a Dental Nurse before graduating from Barts & The London School of Medicine & Dentistry as a Dental Hygienist & Therapist (DHT) in 2017. Abbas enjoys practicing dentistry to the entirety of his scope as a DHT; including treating and guiding patients with periodontal (gum) disease, carrying out high aesthetic composite restorations and providing teeth whitening and composite smile makeovers. Abbas has successfully completed the highly esteemed Style Italiano Composite Course in Portofino and enjoys using gold standard methods and materials for his composite cases. Abbas is continuously adding to his skills - he has completed his training in advanced Facial Aesthetics, has gained a Post Graduate Diploma in Periodontics and is currently undertaking a Level 7 Diploma in Clinical Aesthetic Injectables. Abbas prides himself on providing minimalistic and natural yet valuable enhancements after carefully understanding his patients' personal aesthetic desires. He also provides skin rejuvenation treatments such as mesotherapy, microneedling and PRP. Abbas thoroughly enjoys and takes pride in accompanying his father on charity trips to provide treatment to those less fortunate in areas of the Middle East every few months. Outside of Dentistry, Abbas is a keen cook, an avid photographer, a proud husband and father to a beautiful baby boy. When he manages to step away from managerial tasks for the clinic, he enjoys swimming, playing tennis and padel and often travels to European cities to watch tennis tournaments.

Regita Gembickaite Dental Hygienist

RDH | GDC No.: 104904

Regita qualified as a Dental Hygienist in 2003 in Lithuania, She joined the BDAC team in 2013 and is very popular with our patients. Her main goal is to prevent gum disease and educate patients on their daily oral health routine. Outside of dentistry, she enjoys spending time with her family, hiking and paddle boarding.

Charity

At Bullsmoor Dental & Aesthetics Clinic, we are proud to say that we strongly believe in giving back and are deeply passionate about charity work.

In the past, we have held charity bike rides and bake sales for charities such as BBC Children in Need. In November 2022, our team and their families cycled through the streets of London, raising a total of £1,145.00 thanks to all our generous donors.

Further afield, Mr Jagani has been travelling to Iraq since 2011 and Syria since 2018 to carry out dental treatment for those who are unable to afford dental care in remote areas. Since qualifying in 2017, his son Abbas has taken a keen interest in joining him and they travel to Iraq annually and Syria every four months. Having started off with performing emergency pain-relief procedures only, they are now equipped with portable dental equipment and are able to carry out much more treatment, allowing them to save more teeth. Since November 2022, Dr Manji and a number of our nursing team have joined them in their trips to Syria. Unfortunately, due to the unrest in the Middle East, our team was only able to travel to Syria twice in 2023. We pray for all those affected by the horrific massacre and pray for peace in every corner of the world.

In October 2023, Mr Jagani and Dr Manji raised a staggering sum of £5,350.00 for the WF Aid by climbing Mt. Kilimanjaro; this will provide education, sanitation, medical aid and more for those less fortunate in various parts of the world.

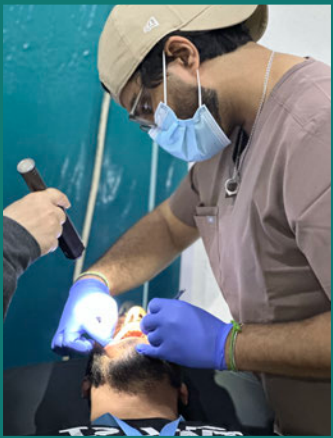

In our clinic, we support The Zahra Trust whose mission it is to aid those suffering from war, poverty and famine, by providing philanthropic needs, enabling them to survive and making them self-sustainable so that they no longer need to rely on aid - feel free to donate to this remarkable charity via the digital donation box at reception.

In 2024, we will be focusing on raising funds for those affected in Palestine as well as donating towards and working with more local charities such as BBC Children in Need, Comic Relief and Dentaaid.

Adult Membership Plans

Improve your general wellbeing and dental health, all whilst enjoying the benefits of our carefully tailored dental care plans and spreading the cost of your annual consultations and preventative hygiene care.

Membership Benefits

- Discounts on clinical and cosmetic treatments¹
- Discounts on oral health care products²
- Free radiographs
- Free emergency assessment
- Free emergency antibiotics when necessary
- Worldwide Dental Emergency Assistance Scheme³
- Redundancy Protection for your monthly payments⁴

	DC 1 + 1	DC 1 + 2	GBT 1 + 2	DC 2 + 2	GBT 2 + 2	DC 2 + 4	GBT 2 + 4
Consultations per year	1	1	1	2	2	2	2
Basic hygiene per year	1	2	-	2	-	4	-
GBT hygiene per year	-	-	2	-	2	-	4
Monthly fee	£14.17	£17.83	£21.09	£23.34	£27.80	£34.24	£40.74
Annual fee	£170.04	£213.96	£253.08	£280.08	£333.60	£410.88	£488.88

our most popular plan

Following your initial consultation, our clinicians will advise you of the best membership plan for you based on your oral health. Should you have any queries about our membership plans, please feel free to ask our reception team to put you in touch with our Plan Manager who will be more than happy to help.

Terms & Conditions

1. All dental treatments must be carried out at Bullsmoor Dental & Aesthetics Clinic. 2. All oral health products purchased at the Clinic. 3. Subject to claim approval. 4. Applicable to compulsory redundancy only and for up to 12 months. An initial administration fee of £9.50 will be applied to your first payment only. 5. Monthly payments are made to Practice Plan Ltd. by DirectDebit. 6. The plan year runs for 12 months from commencement/renewal; if for any reason the membership is cancelled before the end of this period, any discounts given will be repayable in light of early cancellation. 7. Prices effective as of January 2024. 8. Consultations and hygiene appointments included within a membership must be completed within the year of entitlement and cannot be carried forward; missed appointments will be forfeited and no refund will be issued.

Guided Biofilm Therapy

using Swiss-engineered **Airflow®**, **Perioflow®** and **Piezon®** technologies

Guided Biofilm Therapy (GBT) is a systematic, predictable and comfortable approach to the detection and removal of plaque biofilm which causes gum disease and tooth decay. According to evolving research, it can be beneficial to prevent a wide range of other health implications too, including diabetes and heart disease.

A gentle vegetable-based dye is applied to your teeth and gums to detect and clearly highlight the plaque biofilm.

Your hygienist will then spend some time showing you the areas of plaque build up and recommending simple adaptations to your daily oral hygiene regime.

The **Airflow®**, a mixture of water, air and powder, is then used to gently clean the dye and biofilm from your teeth, tongue and other soft tissue areas; this process also removes staining.

The **Perioflow®** is used in patients with Periodontal Disease to remove bacteria from deep pockets between the teeth and gums with the aid of water, air and powder at varying angles.

The **Piezon®** tip's linear movement technology allows for the pain free removal of any calculus deposits.

Benefits of Guided Biofilm Therapy:

- Prevents and treats gingivitis
- Helps detect tooth decay with precision
- Eliminates the need for traditional scaling
- Cleans in areas where scaler tips cannot reach
- Pain free and comfortable
- Use of warm water minimises sensitivity
- Safe for use on fillings, crowns, implants etc.
- Can be used on children as well as adults
- Effective in safe stain removal

Child Membership Plan

Instil the importance of **‘prevention rather than cure’** from a young age by joining our Child Dental Care Plan. Our clinicians will endeavour to acclimatise your child to the dental environment and ensure they are able to look after their teeth to an excellent standard, with an aim to prevent the need for excessive treatment in later life.

Membership includes:

- Two consultations per year¹
- All fillings on deciduous (baby) teeth¹
- Non-surgical extractions on deciduous (baby) teeth¹
- Fluoride application¹
- Oral health education¹
- Free radiographs¹
- Free emergency assessment¹
- Free emergency antibiotics where required¹
- Free referrals to secondary NHS care where necessary and appropriate, including orthodontics (braces)
- Discounts on restorative treatment¹
- Discounts on oral health products purchased at the Clinic²
- Worldwide Dental Emergency Assistance Scheme³

Should you have any queries about our membership plans, please feel free to ask our reception team to put you in touch with our Plan Manager who will be more than happy to help.

Terms & Conditions

1. All dental treatments must be carried out at Bullsmoor Dental & Aesthetics Clinic. 2. All oral health products purchased at the Clinic. 3. Subject to claim approval - 99% of claims are approved. 4. No administration fee is applied to child plan. 5. Monthly payments are made to PracticePlan Ltd. by DirectDebit. 6. The plan year runs for 12 months from commencement/renewal; if for any reason the membership is cancelled before the end of this period, any discounts/inclusions given will be repayable in light of early cancellation. 7. All children joining a plan must be seen for a consultation and declared dentally-fit prior to joining a membership plan. 8. Prices effective as of January 2024. 9. Consultations included within a membership must be completed within the year of entitlement and cannot be carried forward; missed appointments will be forfeited and no refund will be issued.

Plan vs. Private

Joining a dental membership plan can save you a considerable sum in comparison to pay-as-you-go private fees. The example below shows an average patient's treatment over the first two years, allowing you to see potential savings.

Year 1	GBT1+2	Private
Initial Examination	£47.00	£134.00
Radiographs (x2)	n/a	n/a
GBT Hygiene (x2)	n/a	£232.00
Two surface amalgam filling	£159.00	£198.00
Three surface composite filling	£230.00	£288.00
e.max® Crown	£680.00	£851.00
Nightguard	£145.00	£182.00
Annual Membership Fee (inc. £9.50 admin fee)	£262.58	n/a
Year 2		
Examination	n/a	£89.00
Radiographs (x2)	n/a	£32.00
GBT Hygiene (x2)	n/a	£232.00
Enlighten Evolution 4 Teeth Whitening	£671.00	£746.00
3 Area Anti-wrinkle	£240.00	£270.00
Annual Membership Fee	£253.08	n/a
Total	£2,687.66	£3,254.00
Savings over two years	£566.34	

Our most popular plan, GBT 1 + 2 is used in this comparison. Please note, should you have medical/dental insurance through your workplace or otherwise, you may need to pay private fees in order to claim any expenses; many insurance companies will not refund any discounted fees paid under a dental membership plan such as ours. We strongly advise you to check your insurance policy before joining a membership plan.

Finance

We recognise the importance of timely dental care and provide interest-free finance options for all our patients.

We're proud to have partnered with V12 Retail Finance to provide interest-free finance to all our patients (aged 18 and above), ensuring that financial constraints never compromise your well-being.

Our commitment to accessible healthcare extends beyond the examination chair, as we strive to make essential treatments affordable. With our interest-free financing, you can confidently proceed with necessary procedures, promoting not only a healthier smile but also peace of mind.

Experience the care you deserve without the worry of financial barriers at our clinic, where your well-being is our top priority.

Tailor your budget by spreading treatment fees over 6, 10 or 12 monthly instalments. A seamless online application provides an instant decision, allowing you to proceed swiftly with your treatment upon approval.

If you would like to apply for interest-free finance, please let one of our reception team know, who will ensure an application link is sent to your email as quickly as possible.

0% Representative Example

Duration of agreement	12 months
Cost of treatment	£2,850.00
Deposit (optional)	£600.00
Total amount of credit	£2,250.00
12 monthly payments of	£187.50
Total amount payable	£2,850.00

Subject to eligibility criteria, minimum spend of £350.00 and terms and conditions apply.

Dental Implants

Dental Implants can be life changing, giving patients back the ability to speak and eat easily. they're completely natural looking and smile enhancing too.

At Bullsmoor Dental & Aesthetics Clinic, we always recommend replacing missing or extracted teeth, and dental implants are the closest thing to the natural tooth when it comes to replacement. Looking, feeling and acting just like a natural tooth, implants can repair a broken smile while also helping to protect the health of the jawbone, and preserve the natural facial structure of the patient.

What are dental implants?

There are various different dental implants available, all made up of two essential parts - the titanium peg that is inserted into the jawbone and acts as the new root of the tooth and the prosthetic tooth that is held in place on top.

How do dental implants differ from other tooth replacement options?

Dental implants are a permanent, fixed solution, unlike other replacement options such as dentures. They can be looked after just as a natural tooth is, and , if taken care of properly, can last a lifetime. They are also the only replacement option available that helps to preserve and protect the health of the jawbone and facial bone structure.

How long does a dental implant treatment take?

Receiving dental implants can take several months, and you should expect to attend multiple appointments. There is normally a gap between the application of the implant and the placement of the prosthetic while we wait for the titanium peg and the jawbone to safely fuse together. During this time, we'll be able to provide you with a temporary denture or crown.

For more information or to discuss your options, please feel free to book in a free implant consultation with Abbas Manji.

Skin Rejuvenation

Improve your skin texture and tone and reduce the appearance of fine lines, wrinkles, acne scars, surgical scars, stretch marks and pigmentation.

Our skin rejuvenation services consist of three main treatments - microneedling, mesotherapy and the highly sought after PRP facial, also known as the 'Vampire Facial'. These treatments can be performed standalone or in conjunction with one another, depending on your specific skin concerns.

Microneedling

Also known as collagen induction therapy, this is a cosmetic procedure that involves using a medical device with fine needles to create small punctures on the skin's surface. This controlled damage helps stimulate the skin's natural healing process and promote the production of collagen and elastin – the proteins responsible for maintaining the skin's structure and elasticity. The formation of new collagen and elastin leads to the remodelling of tissue.

Mesotherapy

This is a cosmetic procedure that involves injecting a mixture of vitamins, minerals, enzymes, amino acids, hyaluronic acid, peptides and plant extracts into the skin's middle layer, known as the mesoderm. This improves the texture and tone of the skin and reduces the appearance of fine lines and wrinkles, leaving the skin feeling and looking rejuvenated and hydrated.

Platelet-Rich Plasma

Also known as the 'Vampire Facial', this cosmetic procedure involves extracting PRP from your blood to rejuvenate the skin. PRP contains growth factors which are believed to stimulate collagen production and promote tissue repair, leading to an improved skin texture, tone and overall appearance. The procedure, coupled with microneedling, is particularly sought after for its potential to reduce wrinkles, fine lines, acne scars and sun damage.

For more information or to discuss your options, please feel free to book in a free skin rejuvenation consultation with Abbas Jagani.
